[here](#) until July 7, 2025

Hilda Nakyondwa

Summer School Participant in 2024

“As a sustainable energy enthusiast from Uganda, ISS 2024 was life changing! From deep dives into energy and business models to pitching start-up ideas, networking, every moment was enriching.”

Overview

Get ready for an unforgettable Summer School experience hosted by TUM School of Management in collaboration with TUM SEED Center. Join us on a journey centered around renewable energy and entrepreneurship, designed to tackle Sustainable Development Goals 7 and 13.

The global energy transformation presents a major challenge that requires collaborative spirit and innovative thinking to overcome.

Sustainable entrepreneurship, in turn, with its combination of economic, social, and ecological goals, is a powerful tool for tackling this challenge. This is the focal point of our upcoming program.

Join us on the campuses in Munich for the International Summer School, where we'll not only impart technical and practical knowledge but empower you to become a true catalyst for change.

Our triple-pronged approach

Inform: Gain valuable insights from state-of-the-art research at the crossroads of sustainable energies and entrepreneurship, courtesy of a business school with triple crown accreditation. Additionally, tap into the wealth of knowledge offered by seasoned sustainable entrepreneurs.

Inspire: Engage with individuals globally, cultivate ideas for sustainable entrepreneurship, and transform them into viable business models. Draw inspiration from students who have translated their passion into a formalized student organization.

Interact: Collaborate with committed scholars and sustainable entrepreneurs within the renewable energy and e-mobility sector. Engage in hands-on activities, share insights, and connect with students and professionals at our TU eMpower event. Capitalize on the diverse experiences of your peers in this exceptional setting.
